"The Economies of Queer Inclusion: Transnational Organizing for LGBTI Rights in Uganda"

The Anti-Homosexuality (dubbed "Kill the Gays") Bill of 2009 propelled Uganda to the forefront of global media. The attention earned by the proposed legislation opened avenues for transnational cooperation between U.S.-based Human and LGBTI Rights organizations and LGBTI Ugandans. The Economies of Queer Inclusion focuses on this transnational relationship and the complications that arise when international currency and professionalization transform grassroots organizing. This book excavates how transnational advocacy, which aims to empower LGBTI rights activism, actually restructures and, in some cases, limits local movements. With interview and ethnographic data, the research highlights how the introduction of international attention and funding causes organizations to restructure their movement goals and strategies in order to best attract desired partners. The funder-funded relationship causes both local discord and transnational divestment from alternate forms of organizing. The research presents a compelling, counternarrative that exposes that the development of this economy did not occur because of the Anti-Homosexuality, but rather inspired the legislation and then peaked in the five years following.
